## DETAILED ACTION

### *Election/Restrictions*

(1)

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, drawn to a process for preparing a structure comprising carbon nanotubes, classified in class 264, subclass 108.

II. Claims 14-20, drawn to a structure comprising carbon nanotubes, classified in class 428, subclass 221.

III. Claims 21-28, drawn to an apparatus, classified in class 425, subclass 461.

(2)

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by extruding a composite of carbon nanotubes in a matrix material.

Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice a different process such as making core-sheath fibers of polymer or glass.

Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product as claimed can be made by a different apparatus such as an extruder.

(3)

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

(4)

During a telephone conversation with Garth Dahlen on February 25, 2004, a provisional election was made with traverse to prosecute the invention of Group I, claims 1-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14-28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

## EXAMINER'S AMENDMENT

(5)

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garth Dahlen on March 2, 2004.

The application has been amended as follows:

Non-elected Claims 14-28 have been cancelled.

(6)

The following is an examiner's statement of reasons for allowance: The closest prior art of record, WO 01/92381, discloses forming fibers of nanofibers dispersed in a polymer matrix then removing the polymer to leave fibers only of nanotubes. The prior art of record does not disclose or suggest forming a structure comprising carbon nanotubes by melt flowing a polymer through a spinneret to form a core of molecules aligned substantially parallel and combining a composition of melted sheath polymer and carbon nanotubes with the flow of the core to form a sheath having carbon nanotubes aligned with the molecules of the core polymer prior to removing at least 50% of the core and sheath polymer molecules.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

(7)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Curtis Mayes whose telephone number is 571-272-1234. The examiner can normally be reached on Mon-Fri 7:30 AM - 4:00 PM.
